Latest product: Acitest UNIPRO

For testing the acidity of refrigeration oils

The Acitest UNIPRO product has replaced Acitest and Acitest Universel. The new Acitest UNIPRO does not contain toluene (now classified as CMR) or any other substance that is harmful to humans.

Acitest UNIPRO enables the acidity of the oil to be determined on site by giving an indication of its condition, either, good, border-line or acid.

Within seconds, an accurate and valuable diagnosis enables vital measurements to be taken that can avoid a breakdown and its costly consequences.

Benefits of Acitest UNIPRO:

- its new formulation, developed by R&D within Dehon Group, means that this single product can be used whatever the type of refrigeration oil is contained in the installation: mineral (MN), alkylbenzene (AB), polyalphaolefine (PAO) or polyolester (POE).
- a longer expiry date makes stock management easier with a 2 year shelf life as opposed to 6 months for previous versions).

About Climalife, Dehon Group

For more than a century, Climalife has been Europe's specialist in cooling fluids for refrigeration and air conditioning. Its dynamism and commitment to quality and protecting the environment has also enabled it to gain cutting-edge expertise in the heating and renewable energy markets.

More than 100 employees are available to share their knowledge on diverse sectors such as; industrial markets, commercial markets (large outlets, local stores, etc.), housing and apartments, and the service sector (offices, hospitals, airports, etc.).

They can meet your needs with a range of products and services suitable for any climate control system: refrigerants, secondary refrigerants/heat transfer fluids, lubricants, equipment, cleaning, brazing alloys, analysis, services.

Climalife benefits from the structure of the Dehon Group, a key player in performance chemistry, developing innovative solutions and building special partnerships with professionals, particularly producers, manufacturers, industrial firms, and distributors.

Innovative services developed for safety and the environment, regular technical and regulatory information, and high-performance tools complete this comprehensive plan.

Climalife offer their products and services worldwide, thanks to a global distribution network made up of 11 subsidiaries (Belgium, France, Germany, Hungary, Italy, Netherlands, Russia, Scandinavia, Spain, Switzerland, and United Kingdom) and an export subsidiary, Galco-Climalife, for the rest of the world.
